Custom Pools & Pool Finishes

SEAMLESS POLYMER POOL COATINGS · BUILT FOR WEST TEXAS

SAN ANGELO, TEXAS

aussieblock.com

— WHAT WE DO

One crew, start to finish.

We build and finish in-ground pools across the Concho Valley — pouring the footing, raising the shell in our own Aussieblock limestone block, and coating the surface in-house. No subbing out the part that matters most: the finish you actually swim in.

Custom Construction

Excavation, a poured footing, and the pool shell laid up from our own Aussieblock limestone block.

Polymer Finishes

A spray-applied, seamless elastomeric surface that bonds tight, resists UV fade, and stays slip-resistant underfoot.

Color Selection

Choose from a 180-color palette — from pearl whites to deep marine blues — matched to your water and decking.

Coping & Decking

Limestone coping and concrete or paver decking, poured and set to frame the pool clean.

— THE SURFACE

A finish that lasts, in any color.

Our coating goes on as a continuous, flexible membrane — no grout lines, no chalky plaster. It shrugs off West Texas sun and shifts with the slab instead of cracking against it.

— HOW IT GOES

Four steps to swim.

01 Walk the site

We look at access, soil, grade, and how you want to use the space — then quote it straight.

02 Build the shell

We pour the footing from our own ready-mix and lay the shell up in Aussieblock limestone block.

03 Coat & color

The finish is spray-applied in your chosen color and sealed.

04 Fill & hand off

Coping, water, startup chemistry, and a walkthrough of how to keep it easy.
